

The Visa officer,
Department of Home Affairs,
Australian High Commission,
New Delhi, India

Introduction and background

I amborn on..... I am the permanent resident ofMunicipality, Ward No. with a small sized joint family. I completed my Secondary Education Examination (SEE) fromInternational School, in with a GPA of After that I joinedSecondary School in management faculty with computer science as a major subject. I completed my +2 examination in with the GPA of Following my dreams to study abroad I attended PTE/IELTS exam onand I scored overall bandwith each band score of Listening, Reading, Speaking, Writing..... With this academic and English proficiency test, I am planning to study abroad for my higher education.

Why Not Nepal?

I choose Australia over my home country Nepal because here are few Universities which are well recognized that run the Bachelor of business program. I came to know that colleges such as ACE College Affiliated to Pokhara University, British College, Tribhuvan University are well recognized college in Nepal. To get admission in these recognized universities is too tough because of the limited seats. There are also colleges where we can get admission but that college focuses on theoretical aspects rather than practical aspects. When working in real world, only theoretical knowledge is insufficient to stand as a competent professional. Nepal is beautiful country and famous in tourist destination, the hospitality industry needs to maintain international standards, so the skills and knowledge gained here will turn out to be insufficient and become incompetent in professional career. It is also my dream to get international degrees and serve my nation and people with my knowledge and experience.

Why Australia?

Australia has one of the best and progressive educations systems. Australia is different from other countries because it has many groups and laws that help international students. International students' rights are protected by the ESOS act (Education Services for Overseas Students). It protects the financial rights of international students through TPS (Tuition Protection Service). Australia also has cultural diversity, friendly natives, and high quality of education.

Why not USA UK and the Canada?

Apart from Australia, I researched about other destinations such as Canada, UK and USA. However, various factors lead me to choose Australia. The cost of living in the USA and the UK is higher as compared with Australia. Canada is also one of the preferred destinations for higher education but the processing is too long for a student visa. Also, the year-round extreme cold climate of Canada made me exclude it from the list of study destinations for the interest of my subject. Alternatively, the climate of Australia is similar to that of Nepal. Similarly, European countries are also well known for quality education but the high living cost and the need for learning their native language is the reason for not choosing European countries. I am willing to excel my careers from Australia which would help to achieve my goal. Therefore, I choose to study in Australia to get qualitative education in the field of hospitality industry.

Some more researched about those countries are like:-

UK: The condition of weather in UK is very refreshing throughout the year. However, the living cost along with the expenses and accommodation cost is higher which creates uncomfortable situation to adjust the bills. Also, the university fees are also higher in comparison to Australian because the exchange rate of Australian dollar and UK Pound Sterling has a very vast difference.

USA: The exchange rate of American dollar is increasing day by day which makes the international students hard to bear the fees and living cost is also high in USA. Also each state of the US follows different curriculums for courses that create students of varying standards of education.

Canada: As per my research climate in Canada is cold for many months which may create difficulties for living as I don't have habit of living in much cold climate.

Why Sydney?

To choose an appropriate location for my study was also a challenging task for me. After researching on cities like Melbourne, Brisbane, Sydney, I don't found vast difference on those cities. Sydney offers students a rich living environment. Its multi-ethnic culture makes it a great choice for me. As a great city, it offers a world-class lifestyle along with tons of activities to do. Moreover, the qualification and courses from the universities in Sydney are globally recognised and Sydney has a very efficient and convenient public transportation system, making commuting easy for students and the friendly atmosphere, lively culture and excellent education opportunities are some of the best reasons to study in Sydney.

Why Torrens University Australia?

It was a bit tough to select an education provider being an international student. While researching about the universities, I came across a number of universities like the University of Queensland, Southern Cross University, Griffith University, Torrens University Australia. Also I found difference in their fees structure like the university of Queensland have AUD29000 per year, Southern cross university have AUD30,640 per year, And Griffith university have AUD31000 per year. As a result I choose Torrens University Australia because of its course structure, fees, and so on. I also can complete my Bachelor in Hospitality management within around AUD 72,252.00 for three years which kind fall into my budget as well as It has best facilities like other one.

The Torrens University Australia is a world-class university with a strong focus on student experience, excellence in teaching, and research. Torrens have small classes and individualised learning which allows their students to learn faster and progress through the material quicker. They offer flexible and dynamic online study options allowing students to access course material on demand. So as a result I found Torrens is the best choice for my further study.

Under Torrens University William Blue College provide course of Bachelor of business (Hospitality Management). As per my research on William Blue College I came to know that this college came to Australia as a convict and became one of their first tourism and hospitality entrepreneurs. William Blue College helps in flexible study options and accelerates students' career progression. Also in the field of hospitality management it has earned a reputation for excellence.

Why Bachelor of Business (Hospitality Management)?

Bachelor of business provides the academic knowledge and skills to pursue global career opportunities and helps to develop specific areas such as finance and human resources. When I study a Bachelor of business, I will establish a firm understanding of the contemporary business environment and undertake studies in a range of disciplines.

This program provides students with the knowledge, skills, and experience necessary to succeed in the industry, and opens a wide range of career opportunities for graduates. A hospitality management program provides students with a strong foundation in business principles, such as marketing, finance, and operations management, which are essential for success in the industry. The hospitality industry is a vast and dynamic field, and a hospitality management program provides students with the flexibility to pursue a career path that aligns with their interest and goals. The Bachelor of business integrates opportunities for me to gain national and international workplace experience and professionals.

Financial Background

Talking about Financial background my parents will sponsor for my further study in Australia for Bachelor Degree. My father Mr.operate a business ofwhich have annual income of Nrs....., My Uncle Mr. is a job holder inwhose annual income is Nrs., And My Grandfather Mr.who have annual income in Agriculture of Nrs and also have Annual income in Land Lease of Nrs They are always willing to support me by bearing all the expenses related to my stay in Australia. Total Annual Income is Nrswhich is equivalent to AUD

Career plan

As Nepal is rich in natural heritage I found hospitality management can be best for my career. After completing my bachelor's degree from Torrens University Australia I will also complete my master's degree on same course which will add my knowledge and experience to this course. After completing my degree I have look for Accor Hotels, Hilton Hotels, Shayngri-la hotels and resorts, penshurst Hotel, to work for more international experience. I will get knowledge and experience and having a international degree I will get a wide range of opportunities to explore my Knowledge and experience in Nepal.

In Australia hospitality management graduates can earn higher salaries of AUD 50,000-60,000 per year where in Nepal hospitality management graduates can earn Rs 20,00,000-30,00,000 per year. Therefore graduates from Australia helps to have better job opportunity, higher salaries, and more opportunities comparison to graduates from Nepal. Due to better infrastructure Australia can provide more comprehensive training and practical experience due to the developed industry. After working for a few years and understanding the market strategy I also have a dream to start a hotel and travel agency with all the skills and experiences that I achieved. As Nepal is naturally gifted country I can see good career in Nepal.

Incentives to return back to home country

As all my family members and relatives are in Nepal, I cannot just stay abroad being far from them. I also have my responsibility towards my country and the society. As my parents are getting older day by day, as a responsible son, I must take care of them. After successful completion of my bachelor degree in hospitality management and experiencing further knowledge in this field, I will return to my home country to fulfil the dreams of contributing to the hospitality and tourism industry of Nepal. According to the Nepal Tourism statistics 2020 report published by the ministry of culture, Tourism and civil aviation, the tourism industry in Nepal was growing before the COVID-19 pandemic. In 2019, Tourists who visited Nepal was increased by 8.24% then previous year. It is difficult to predict the expected growth of any specific hotel or growth of foreign tourists because it depends on several factors such as the local economy, and external factors like natural disasters or any kind of pandemics.

Also, Even in my professional life I want to celebrate different festival like dashain, tihar, Holi, and other which have different emotions, feeling with family, friends, and relatives.

Being a genuine and laborious student, I assure you that I will finish my intended course in the proposed duration under all the visa conditions and I will return to my own home country to explore gained knowledge and skills gained from Torrens University Australia. So, I took forward to study for a Bachelor of Tourism and Hospitality Management in Torrens University Australia and be a part of reputed and successful university in Australia.

Sincerely,
